P+MM

PROJECTOR+ MAPPING MODEL

WEATHERCOCK
WE CAN BRING YOUR IMAGINATION TO LIFE.

This product is combined with the projector and 3-D model and it expresses hi-quality images with our original editing technology.

This product expresses a lot of local information because it enables the 3-D model to project changing image on it.

We developed a device which makes it possible for producers and viewers to be able to understand, and share knowledge and also to look at everything from the same point of view.

P+MM
PROJECTOR+ MAPPING MODEL

Exhibition
It is suitable to give presentations at portable exhibitions.

Geographical Information
It can express a variety of geospatial information on the 3-D model in real-time.

Characteristics 1

High Quality

This device is operated with a 3-D model and images, and it fixes the gaps of images in pixels in order to project 3-D images.It has a function of a map and updates information constantly.

Characteristics 2

Interesting Changeable Scenery

This device enables a 3-D model to project different types of images and movies as if the model is moving.

Characteristics 3

Artistic and Beautiful PMM

Projectors are usually seen from a distance but PMM can be seen closely as you watch a monitor, which expresses high-quality images.

Characteristics 4

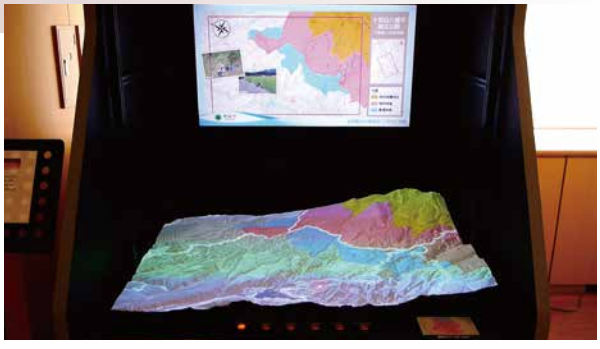
Original Technology Named “3-D Fit”

General projectors need time to fix the gaps of images to create 3-D images, but our originally developed software named “3-D Fit” is able to fix the gaps of images instantly. Therefore, it is suitable to give presentation at portable exhibitions.

Characteristics 5

Extra Description with a Monitor.

It is possible to combine the 3-D model and the projector with a monitor, which describes extra information.



We can bring your imagination to life.

P+MM portable

It is convenient to carry around.

1. It is easy to carry because it is housed in a suitcase.
2. You can edit projected images freely.
3. You can edit stories freely.
4. You can easily change 3-D models.
5. It is easy to install the device.
6. Our original software,"3-D Fit" is able to fix the gaps of images instantly.
